Data-driven engineer skilled in building efficient, resilient software products in the cloud. Experience leading database migrations, deploying production pipelines and driving product vision forward with a creative mindset. My recent work includes [Canada's G7 Accountability Report](#) and a personalized customer footprint product for Kinaxis' CEO and CPO. Valid Level 2 Security Clearance (Secret).

Education

Honours Bachelor of Science, Computer Science - University of Ottawa

2022 - 2027

- Dean's List, Courses such as: Design & Analysis of Algorithms, Operating Systems, Data Structures, Software Engineering

Work Experience

Data & Analytics Engineer Intern - Kinaxis

Sept 2025 - Present

- Delivered a customer footprint dashboard for the incoming Kinaxis CEO in 1 month using Power BI Dataflows, BigQuery, and an internal log collector API - praised by our VP of Cloud Services as "amazing" and "exactly what we were looking for"
- Migrated 10+ years of ServiceNow and LogicMonitor data from Postgres to hive-partitioned GCS buckets using Python and dlt, laying the groundwork for an org-wide Postgres and Grafana decommission and the elimination of 2+ days of monthly manual reporting for our FinOps Lead
- Used dbt to build staging, intermediate, and mart layers that handle 50K+ Google Analytics events daily for our marketing team
- Analyzed 110+ Grafana reports using Bash, Python, and SQL, identifying 80%+ as unused or redundant candidates for deprecation, and delivered cloud provider filter enhancements (Azure, AWS, etc.) to the Director of Cloud Services
- Migrated 41M rows of Eloqua marketing campaign data from Snowflake to GCS using Python, dlt, Cloud Build, and Cloud Run
- Optimized a Win/Loss prediction model in BigQuery ML using Gemini 2.5 and Salesforce comments to classify sales opportunities by likelihood of closing
- Built a BigQuery cost analysis Chrome extension at our 2025 Hackathon, comparing query costs against GCP commitments and providing optimization strategies through Vertex AI

Junior Statistical Analyst - Global Affairs Canada

Jan 2025 - July 2025

- Designed a multi-source pipeline that fetched World Bank, OECD, UN, and WEF indicators via REST API, mapping ISO codes to GAC recipient codes, and parallelizing ingestion with Python's ThreadPoolExecutor to reduce runtime by 99.8%
- Built a development indicators Power BI dashboard, enabling 10+ Directors to model what-if policy scenarios across G7 development sectors and run exploratory analysis on HDI, mortality, poverty, and education data from 190+ countries
- Curated and validated 5+ years of cross-institutional data backing 50+ statistics in Canada's G7 Accountability Report (Kananaskis 2025), spanning human development, governance, and security across ODA-recipient countries

Personal Projects

MILL

2026

Typescript, Next.js, Drizzle, PGLite, Postgres,

- Designed and engineered a full-stack application to streamline & speed up planning through a hierarchical-based interface. Users can create projects & workspaces in which their ideas live, connect them using a DAG system and use Anthropic's CLI to assist project planning. Once planning is complete, users can serve project ideas to apps such as Todoist and Google Calendar via MCP.

LIVE OC TRANSPO BUS ANALYTICS | oc-transpo.streamlit.app

2025-2026

Python, SQL, PostgreSQL, dbt, Streamlit, GitHub Actions, CI/CD, ELT

- Engineered an end-to-end Medallion architecture to track 700+ municipal vehicles, using dbt for multi-stage transformations on a Neon PostgreSQL database. Hourly ingestion & transformations are handled via GitHub Actions and presented through a Streamlit dashboard, providing real-time observability into city-wide transit performance.

Technical Skills

Languages: Python, SQL, R, Java, TypeScript, JavaScript, HTML & CSS, C, Bash/PowerShell

Frameworks & Libraries: dbt, Pandas, Apache Spark, TensorFlow, Node.js, OpenAI, Vertex AI, Claude, React.js, Astro.js

Infrastructure & Tools: GCP, Postgres, Snowflake, Apache Airflow, Linux, Git, GitHub Actions, Power BI, Looker, Docker, Jira, TCP/IP
